

COMPU-DATA
International, LLC

virtualFileRoom™

VIRTUAL FILE ROOM

- Retrieve Instantly
- Share Securely
- Keep Everything Organized

Secure Cloud-Based Hosting

Search, Store, Retrieve

- Your existing search method becomes a virtual reality
- Separate libraries for different departments
- Scan & index paper documents directly into VFR™

Find It Easily

- Customized search filters make it easy to pinpoint documents
- Fast & easy-to-use search clue box
- Able to search across multiple libraries

Manage

- User and document level security allows complete control of data
- Advanced security feature encrypts data in VFR™
- Unlimited Scalability

On-Premise Hosting

Just like storing in our hosted environment, we set up the product in your facility. We work with your team to configure and implement our system, providing you with the remote system management staff needed for continued success. We ensure our system is maintained properly without the long-term investment of additional personnel and specialized knowledge. As an extension of your organization's IT team, we focus exclusively on helping you manage your unstructured data with capture solutions, workflow automation, and Virtual FileRoom™.

Benefits of Virtual FileRoom™

Reduced Operating Costs

Our technology, combined with the industry's best data capture experts, gives you the maximum amount of savings for the minimum amount of investment. Instantly save money on storage costs associated with off-site storage, as well as labor costs associated with maintaining a paper-based system.

Increased Business Productivity

No more hard-to-read paper forms or manual entry of data. You get consistent, automated processes that deliver the information you need, where and when you need it.

Data Integration

One standard data integration approach.

Improved Data Quality

Automation means consistent data capture protocols and processes, improving data quality and customer service.

Better Data Security

In today's environment, you're always sure our solutions can meet compliance requirements. We protect our data from the moment it's captured with military-grade, 256-bit encryption to guard against inside threats and data breaches.

Improved Accessibility

Use it as a portal to access all of your data resources.

Why Choose COMPU-DATA?

Our Experience

- Over 35 years in the industry
- Product developed for US Government classified data systems
- Enterprise Search Technology foundation

Convenience

- Easily store, search and retrieve data
- Cloud-based or on-premise hosting to meet your team's needs
- Standard hosting packages provide desktop scanners and software for capturing information and uploading directly into Virtual FileRoom™

Security

- Cloud system hosted in a facility with Tier IV Certification, 24-hour security, PCI & HIPAA compliancy
- 256-bit encryption

Our Mission

Empower users to access information instantly and without barriers to uncover knowledge through technology
